Asset management strategy

The fund lost 1.64% in March, underperforming its benchmark, which ended the month down 0.99%. The portfolio's investment ratio and beta ended the month at 99% and 118% respectively, giving a yield to worst of 5.6% and a modified duration of 3.9. The fund's beta rose during the month as the fund participated in a number of primary issues, which will be added to the benchmark as and when it is rebalanced.

The high-yield market lost 0.99% in March, its worst monthly performance since September 2022. In particular, the market suffered as yields rose sharply following Germany's decision to abandon its debt brake and pass a huge investment plan designed to revive the country's economy and boost its military capability. Against this backdrop, the German 10-year yield rose 33 bps in the month, with 30 bps of that rise coming on 5 March, the biggest daily hike in the 10-year yield since 1990. As yields rose, high-yield credit spreads widened 56 bps, the biggest monthly widening in two years, as future US import tariffs fuelled major macroeconomic uncertainty.

By rating, the high-yield market saw a significant decompression in the CCC-rated segment, which ended the month down 1.99%. Meanwhile, BB- and B-rated debt put in similar performances, down 0.91% and 0.86% respectively. In the CCC-rated segment, the biggest monthly underperformer was Cerba, which announced that it had hired legal advisors. Meanwhile, according to press reports, Cerba's creditors are getting organised.

The fund's underperformance relative to its benchmark was largely down to its duration overweight (which cost 29 bps of relative performance) against the backdrop of an economic slowdown in Europe. The rise in yields also penalised hybrid bonds in the portfolio (including Aroundtown, Grand City and Telefónica). Lastly, the fund was adversely affected by its exposure to automotive equipment manufacturers (Faurecia, Antolin, Adler Pelzer), with the US announcing 25% import tariffs on all cars manufactured outside the country.

The primary market had another very busy month in March, with nearly €8 billion of new issues in the month. In particular, there were a number of issues by automotive equipment manufacturers (Forvia: €750m; Schaeffler: €1.15bn; and IHO: €320m). Other refinancing issues included Getlink (€600m), Ontex (€400m), Fnac (€300m), Sécché (€400m), Alstria (€500m), SNF (€550m), Viridien (€475m) and Itelyum (€700m). The fund participated in most of the new issues.

In terms of flows, macroeconomic uncertainty resulted in substantial outflows of \$2.8 billion from the European high-yield market. The upshot is that, following February's strong inflows, net inflows in the year to date are now only just positive. Meanwhile, the US saw nearly \$3 billion in inflows in the month, bringing year-to-date inflows to \$10 billion.
